

Yellow Mag II Improved Pilot Ladder and Spill Boom Magnets

Patent NL2011620 Improvements include:

* Lighter by 1.6 Kgs (~33%) for easier and safer handling and deployment

* Flexible base and magnet mounts to ensure much surer and safer grip on rough or curved ship hulls

* Same magnetic strength but 15% less energy required for release

* Improved rust-resistance

In keeping with Serpent & Dove's continuous product improvement policy this product has undergone significant up-dating and is subject to new patent processes internationally.

* As tested on ground steel plate.
May vary on painted, irregular or corroded surfaces or weld seams.

The original Yellow Mag Pilot Ladder Magnet just got even better!

Product Features:

- * Resin encapsulated neodymium magnet elements
- * Improved flexible magnet mounts for better grip on rough surfaces
- * Stainless Steel swivel ring for tie off
- * >450 kgs grip* with Lloyds statement but removes easily with lever handle
- * Supplied as single units or in set of 4 in strong plywood box

New Part Number is YELLOW MAG II
for single units OR, for set of 4 in strong
plywood box, YELLOW MAGS IIx4
